

ABDUL MOEEZ

BS Software Engineering Student | Aspiring Software Engineer

✉ moizjutt7717@gmail.com 📍 Sheikhpura, Pakistan 🐙 github.com/ABDUL-0MOIZ 🌐 Abdul Moez

PROFESSIONAL SUMMARY

Motivated BS Software Engineering student at UMT with strong foundations in Java, C++, ASP.NET, and web development. Passionate about building practical software solutions and eager to grow through internship experience. Quick learner with 25+ GitHub projects demonstrating consistent initiative and technical growth.

EDUCATION

BS Software Engineering

University of Management and Technology (UMT), Lahore

2023 – Present

TECHNICAL SKILLS

Languages Java, C++, C#

Web Dev HTML, CSS, JS, ASP.NET, Java spring boot, Node Js

Tools Git, GitHub, Docker

Databases SQL, MongoDB

Concepts OOP, Data Structures, Software Engineering Fundamentals

CURRENTLY LEARNING

✓ Spring Boot — how to implement kafka and Redis IN Spring Boot Application

PROJECTS

School Management System *[Spring Boot]*

Developed a RESTful School Management System using Java, Spring Boot, MongoDB, and Spring Security. Implemented JWT authentication, role-based authorization, CRUD APIs, validation, Redis, Swagger/OpenAPI, and testing with JUnit/Mockito.

 <https://github.com/ABDUL-0MOIZ/SchoolManagementSystem.git>

Facebook Clone *[HTML / CSS]*

Frontend clone of Facebook's UI with responsive layout and advanced CSS styling.

 github.com/ABDUL-0MOIZ/Facebook-clone

Hajvary Developer – Apartment Booking *[Java (Swing GUI)]*

Desktop GUI application for apartment booking built with Java Swing, simulating real booking flows.

 github.com/ABDUL-0MOIZ/Hajvary-Developer

TextileManagementSystem [ASP.Net(Grouped Project)]

Complete Enterprise Application For Textile Management System using Asp.Net MSSQL with Entity Framework and basic authentication and authorization Using Cookise and Sessions Views with Razor Pages

 github.com/HusnainMalik0705/TextileManagementSystem.git

NoteBook App *[Node.js / CSS]*

Web-based notebook app to create, save, and manage notes — first full Node.js project.

 github.com/ABDUL-0MOIZ/NoteBook

Election System [Java]

Java-based election management system handling candidate registration and vote tallying.

 github.com/ABDUL-0MOIZ/electionsystem

AutoEase [Collaborative Team Project]

Full software development lifecycle project — planning, development, and delivery in a team setting.

 github.com/ABDUL-0MOIZ/AutoEase

Point of Sale System(POS)[Java]

Desktop Application with full CRUD operations applying discount to special customer built using OOP principles and UI with Java Swing .

 github.com/ABDUL-0MOIZ/ POS
